PROJECT EXPERIENCE

Spotify but Better
02-2025 - 02-2025

Full-stack Personal Project https://realtime-spotify-clone-pvca.onrender.com

- Built a **full-stack** music streaming application enabling users to play/pause, skip tracks, and adjust volume
- Developed an **Admin dashboard** to create new albums and songs, complete with secure authentication and role-based access
- Integrated **WebSockets** to display a **real-time chat** feature, including online/offline indicators, so users can communicate while listening
- Displayed **live user activity** to show what others are listening to, updating the interface in real time

YelpCamp Web Application
07-2024 - 10-2024

Full-stack Personal Project https://yelpcampdk.vercel.app

- Developed a full-stack web application for campground reviews using **React, JavaScript, Node.js, Express.js, and EJS templating**
- Integrated user authentication and authorization with **Passport.js** for secure user login and registration
- Implemented **CRUD** operations for campground listings and user-generated reviews
- Deployed the application on Vercel for seamless hosting and **MongoDB Atlas** for cloud database management

Link Prediction in the Bitcoin Network
11-2022 - 09-2023

Master Project in Universität Zürich, Supervisor: Dany Kamuhanda

- Extended static link prediction scenarios to address the dynamic **link prediction** paradigm using **Python**.
- Undertook a comparative analysis of the performances exhibited by four methodologies (Node2Vec, GraphSAGE, CTDNE, and VGRNN) applied to Bitcoin user networks across various temporal intervals (daily, weekly, monthly, yearly).

PROFESSIONAL EXPERIENCE

Research Assistant
10-2024 - 03-2025

UNIVERSITÄT ZÜRICH, ZÜRICH

- Responsible for cleaning and organizing datasets from companies' statements using **web-scraped** data and utilizing **Python** for parsing and analysis of financial tables and textual data
- Assist with the application of machine learning models, such as **large language models (LLMs)**, decision trees, and text analytics for advanced data analysis tasks
- Contribute to strategic management research with a focus on multinational enterprise transformation, mergers & acquisitions, and corporate governance

Investment Analyst Intern
02-2021 - 03-2021

HANGZHOU HUPAN LICHENG INVESTMENT MANAGEMENT CO., LTD. (THE RIVERSIDE FUND), BEIJING

- Created dashboards and visual reports using **Tableau** to present findings on toiletries, small appliances, and low-alcohol industries, providing stakeholders with clear insights and strategic recommendation
- Developed advertising strategies for emerging brands by analyzing historical data performance and predicting future trends

Investment Intern
06-2020 - 08-2020

HUBEI ZHONGJING SHENGSHI INNOVATION INVESTMENT FUND MANAGEMENT CO., LTD., WUHAN

- Contributed to fund park planning by evaluating economic benefits and payback periods for various investment methods
- Conducted **independent research**, producing 15,000-word reports on the OLED panel, and the SaaS industry, employing data analysis to understand supply, demand, costs, pricing, and competition
- Assisted in revising **government investment documents** and created an industrial overview and investment plan for a city

Investment Banking Department Intern
03-2020 - 04-2020

CHINA INTERNATIONAL CAPITAL CORPORATION, BEIJING

- Solely completed a major mining assets reorganization **industry report**, using **data analysis** to evaluate competition and market dynamics
- Evaluated 24 companies' transactions using comparable company and transaction methods, calculating **PE and PB ratios**
- Conducted **SPAC** products research, using data visualization tools to analyze equity structure changes/transaction considerations/ valuations
